1. Getting Started

Account Creation

Accounts are created by an administrator. You will receive your **Student ID** (username) and your initial password is your **Student ID**.

First Login

1. Open the platform URL in your browser
2. **Student ID** login mode is selected by default
3. Enter your **Student ID** and **Student ID** as password
4. You will be prompted to **change your password** on first login
5. Enter a new password (minimum 6 characters), confirm it
6. Sign in again with your new password

If You Forget Your Password

Contact your teacher or administrator to reset it.

2. Your Dashboard

After logging in, you land on the **Dashboard** which shows:

- A welcome message with your name
- Your enrolled courses in a grid

Use the **sidebar** on the left to navigate between sections:

Section	Purpose
Dashboard	Home — view your courses
Courses	Browse and access all enrolled courses

Section	Purpose
Exercises	Browse practice exercises
My Answers	View all your submissions and grades
Resources	Access learning materials

3. Exploring Courses

Viewing Your Courses

From the Dashboard or **Courses** page, you can see all courses you are enrolled in.

Course Content

Click a course card to open it. Inside each course you will find:

- **Notifications** — announcements from the teacher
 - **Assignments** — graded work to complete
 - **Posts** — discussions and updates
-

4. Viewing Exercises & Submitting Answers

Finding Exercises

1. Click **Exercises** in the sidebar
2. Browse the exercise list, filter by title, tags, or difficulty
3. Click any exercise to view its details

Submitting an Answer

1. On the exercise detail page, click **Submit Answer**
2. You'll see the question statement and any formal description
3. Provide your answer in two parts:
 - **Informal Answer** (required) — explain your solution in natural language (Markdown supported)
 - **Formal Answer** (optional) — write a Lean 4 proof
4. Choose what to do:
 - **Save as Draft** — save your work-in-progress (not submitted for review)
 - **Submit Answer** — submit for grading (cannot be undone)

Lean Verification

If you submit a **Formal Answer** (Lean 4 code), your code will be automatically checked by the Lean 4 compiler automatically.

Verification statuses:

Status	Meaning
Pending	Your code is queued for verification
Verified	Your Lean code compiles successfully with no errors
Failed	Your Lean code has compilation errors — see the error details below your answer
Not Verified	No formal answer was submitted, or verification is not applicable

The verification status appears below your answer. If verification fails, the specific error message from the Lean compiler will be displayed to help you debug.

Resubmitting After Compilation Failure

If your Lean code **fails** verification, you will see a **"Revise & Resubmit"** link next to the failed answer. Click it to edit your code and resubmit. There is no limit on the number of resubmissions.

Teacher/TA Returns

If your teacher or TA returns your submission (e.g., for revisions), your answer will be set back to draft status. You can then edit and resubmit it.

Important: When you resubmit a returned answer, the system automatically re-triggers Lean verification. The verification status will be set to **Pending** and the Lean compiler will re-check your formal code.

5. Checking Your Answers

Go to **My Answers** in the sidebar to see all your submissions:

- **Status:** Draft / Submitted / Graded
- **Verification:** Pending / Verified / Failed
- **Score:** Your grade (once reviewed)

Click **View** on any answer to see details and grader feedback.

6. Assignments

Assignments are graded coursework created by your teacher.

Viewing Assignments

Open a course and go to the **Assignments** tab. Click any assignment to start working.

Answering Assignment Questions

1. Each assignment has one or more questions
2. Answer each question with an informal and/or formal answer
3. Save answers individually as you work
4. When all questions are answered, click **Submit Assignment**

Note: Once submitted, an assignment is final and cannot be edited.

Checking Grades

Your score and feedback appear in the assignment view after the teacher grades it. You can also see all graded submissions in **My Answers**.

7. Resources

The **Resources** page provides curated learning materials for Lean 4:

- **Getting Started** — environment setup guides, online playgrounds
- **Textbooks & Docs** — official tutorials, theorem proving guides
- **Interactive Exercises** — browser-based Lean practice
- **Theorem Search** — tools to find theorems in Mathlib4
- **Community & Tools** — Zulip chat, GitHub repositories

Use the filter sidebar to narrow by type or difficulty.

Need Help?

- Contact your teacher or TA for course-specific questions
- For technical issues (can't log in, broken page), contact the administrator
- Join the [Lean Zulip Chat](#) for Lean language help
